Good Morning Laura!

Thanks for the forward, inclusion, and links to both the Workshop information and Kampachi Farms info.

As a recap, I have attended all three sessions of GMRI's MREP, to include Aquaculture last year (Portland, and New Orleans.) Great to see updated briefs and information updated from last year and key speaker engagement/s.

Aside from Pensacola Bay Oysters Farm, and the previous fin farm that was proposed off Destin – not sure if that is still in review, overcome by events .... and the species was also Almaco Jack I believe, is the Kampachi the first for Florida? I ask as the serialization is FLOA00001? Perhaps this is just the fiscal/calendar number assigned derived from permitting.

Again Thanks!! Hoping all is well & Best from Pensacola.

Evan.

Greetings!

You are receiving this email as you either attended, or were invited to, the Florida Sea Grant Off-Shore Aquaculture Workshop held June 27, 2019 at Mote Marine Laboratory in Sarasota Florida. The available extended abstracts and presentation are now on our website. I think there is some good stuff there!

<https://www.flseagrant.org/aquaculture/openocean/pioneering-offshore-aquaculture-workshop/> (scroll to bottom of page)

We are still processing the facilitated discussions, but hope to have that information coming soon as well. As always, if you have any questions, please do not hesitate to contact me or any of our Florida Sea Grant Agents and Specialists.

Sincerely,

Laura Tiu
